1/9 | Update on Kawasaki Disease
Negar Ashouri, MD
Infectious Disease, CHOC Children’s

Outcomes: Physician learners will be able to:
• Review highlights from the 2017 AHA Kawasaki guidelines.
• Raise comfort level when evaluating children with incomplete Kawasaki disease.
• Follow suggested treatment options and follow-up for patients with Kawasaki disease.

1/16 | Biologics: The New Rheumatology
Andrew Shulman, MD
Division Chief, Rheumatology, CHOC Children's Specialists
Assistant Clinical Professor, UCI

Outcomes: Physician learners will be able to:
• Review use of new biologic therapies in Juvenile Idiopathic Arthritis, lupus/systemic autoimmune conditions, vasculitis and autoinflammatory syndromes.
• Consider side effects when evaluating patients on these biologics and manage appropriately.

1/23 | Care of the Internationally Adopted + Refugee Child
Amanda M. Shafenacker, MD
CHOC/UCI PGY-3 Resident

Outcomes: Physician learners will be able to:
• Use information about specific diseases and epidemics in a child’s home country to guide evaluation of the internationally adopted, immigrant or refugee child.
• Order the proper tests to evaluate these children for infectious diseases.
• Using available vaccine records, counsel families on the need for additional vaccines.

1/30 | Full breakfast served!
Annual Dr. Sherwin Gillman
Honorary Lecture Series
Newborn Screening for SCID + Disorders Affecting T-cells
Jennifer Puck, MD
PI, Primary Immune Deficiency Treatment Consortium, PIDTC
UCSF Department of Pediatrics
Allergy, Immunology, and Blood Marrow Transplantation Division

Outcomes: Physician learners will be able to:
• Discuss the justification for screening newborns for SCID, how TREC's can be used to make the diagnosis, and the success rate of that screening.
• Use the California Newborn screening TREC algorithm to interpret the results from screening on an individual patient.
• Identify infants in your practice that may have SCIDs, even with negative newborn screening, based on presenting features.

Save the Date – February Topics
2/2 | General Pediatric Case Presentation
2/13 | Tics + Tourette Syndrome
2/20 | M. James Warden Visiting Professor Series
2/27 | Rare Disease Day 2019
