

LEARNING OUTCOMES

At the end of this conference, the participant should be able to:

- Describe the role of providers as members of an interdisciplinary team in providing quality pediatric palliative care.
- Assess the dimensions of culture and how it influences pediatric palliative care
- Consider cultural context when communicating and providing culturally sensitive care.
- Apply basic principles of pain assessment and management in infants, children, and adolescents with a focus on pain in palliative care.
- Develop meaningful communication during pediatric end of life care.
- Address other symptoms common in children with life-threatening illnesses.
- Use provided resources to address ethical issues and legal concerns in palliative care for children.
- Consider the unique aspects of perinatal and neonatal palliative care and use suggested strategies for care.
- Apply suggested strategies for care of a child when death is imminent.
- Follow suggested preparation steps to ensure the best care at the time of a child's death.
- Take time for personal loss, grief and bereavement of a patient in your practice.

End of Life Care Conference

Hear from experts Dr. Betty Ferrell, Dr. Glen Komatsu and Gay Walker, RN as they review the need to improve care and the role of providers as members of an interdisciplinary team in providing quality care; the dimensions of culture and how it influences pediatric palliative care; and pain and symptom management when death is imminent.

The goal of this conference is to provide the professional with tools and techniques appropriate across different communities, cultures, and beliefs.

October 27-28, 2016

Saddleback Anaheim

2095 E. Katella Avenue
Anaheim, CA 92806
