**Title of Abstract:**

AMNIOTIC BAND SYNDROME: A CASE REPORT

**Name of Abstract Submitter:**

KELECHI IKERI, MD - RESIDENT DOCTOR

**Organization:**

WOODHULL MEDICAL AND MENTAL HEALTH CENTRE

**Co-Author / Co-Investigators:**

SURENDRA GUPTA, MD (RESIDENT DOCTOR),

ALEXANDER GERALD RODRIGUEZ , MD (NEONATOLOGIST)

**Abstract Description:**

Amniotic Band Syndrome is a rare disorder that comprises a broad clinical spectrum of defects that include disruptions, deformations and malformations. Presentation is varied and it can potentially result in significant morbidity and mortality. We report a case of a newborn with manifestations of Amniotic Band Syndrome who underwent Z-plasty with release of constriction bands.

Keywords: Amniotic band syndrome. Constriction band syndrome, Streeter's dysplasia. Congenital constriction rings.
